
Freelance Designer

Title: Freelance Designer

Business Unit: Avant Healthcare

Department: Creative Services

Reports to: Traffic Manager, Creative Operations

Summary of the Job

Simply put, we're looking for someone with big ideas who can execute on them. Can you envision ways to blend complex molecular structures with deep human emotion in one fully composited image? Do you take creative ideas, conceptualize, design and present them in multiple executions? Is color, type, illustration and photo manipulation your preferred tools for driving a message forward while maintaining strategic focus?

If so, we need your passion, your vision and your innate ability to crank out high level work. We are an agency so tight timelines, quick thinking and a positive attitude are imperatives.

Send us your resume, show us your book and let's talk about creative opportunities together.

Requirements

Must be located in the Indianapolis area or able to commute daily to Carmel, IN.
